

Early Connections Learning Centers

I understand that by enrolling in a classroom with Early Connections, my child will be part of a program offered in conjunction with Aspen Pointe Health Services, Child and Family Network. This program helps to ensure children are more successful in their social, emotional, and behavioral development by working collaboratively with child care providers and parents. Using a team approach, which includes observation in the classroom, a clinician from Aspen Pointe will be meeting with providers and parents to work together to create and implement strategies to help one or more specified children become more successful in the classroom, as well as at home. The team will determine to what degree services will be provided. Services may include work with child care staff to create a more safe and productive environment, work with parents on supporting the program in the classroom by setting the same kind of structure in the home, and implementing strategies in both the home and school to manage challenging and disruptive behaviors.

I understand that with this partnership, a representative from Aspen Pointe may be present in my child's classroom and that my child may be included in any classroom observation that may be done by consultants in an effort to provide support to the Early Connections teaching staff. If the consultant feels that there are significant behavior problems, the team will meet together to determine the required course of action.
